

Anubhav Yadav

Software Developer | ML & Full-Stack Developer

Uttar Pradesh, India · 6394839172 · ay8400673@gmail.com · github.com/anubhavy-05 · linkedin.com/in/anubhav-yadav-93bb83268

OBJECTIVE

Eager to contribute knowledge, passion, and strong interpersonal skills to a well-reputed organisation, while applying technical expertise in software development and machine learning to solve real-world problems.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science And Engineering — Pursuing

2023 – (Present)

Babu Banarasi Das University, Lucknow

TECHNICAL SKILLS

Languages	Python, Java (Basics), C, HTML/CSS, JavaScript,SQL(Basic)
Frameworks& APIs	Flask, REST APIs,OAuth 2.0,WebSockets,FastAPI, REST APIs, SQLAlchemy (ORM), JWT , .
ML & Data	Linear Regression, Random Forest, LSTM, scikit-learn, pandas
Developer Tools	VS Code, Git, GitHub, Postman,Technical Documentation
Cloud & Database	Render, Vercel, Twilio API ,SQLite,PostgreSQL

PROJECTS EXPERIENCE

Price Prediction for Agriculture Commodities Python · Flask · scikit-learn · LSTM · [GitHub](#) · 2025. Solo . Team of 3
HTML/CSS/JS

- Built an ML system forecasting prices of key crops (rice, wheat, onion) by collecting and cleaning large datasets from government portals (data.gov.in, Agmarknet) and comparing Linear Regression, Random Forest, and LSTM models to identify the most accurate predictor.
- Developed a Flask backend API serving predictions, integrated with an HTML/CSS/JS web dashboard for interactive data visualisation.

WhatsApp Health Chat Bot — Prakalp-Swasthya Python · Flask · Twilio API · Gunicorn · Render · [GitHub](#) · 2025 . Solo
JSON

- Engineered a bilingual (Hindi + English) WhatsApp healthcare assistant using Python and Flask to automate symptom triage and emergency detection, with a JSON-based algorithm for location-specific clinic discovery.
- Integrated Twilio Webhooks for real-time messaging and deployed the full application on Render with Gunicorn, ensuring production-grade uptime and seamless client-server communication.

InsightGrid — Full-Stack Resource Platform Python · FastAPI · JavaScript · Bootstrap 5 · JWT · Google [GitHub](#) · 2026 . Solo
OAuth · Vercel · Render

- Designed and deployed a decoupled full-stack platform for sharing educational resources, with dual-method authentication (JWT + Google OAuth 2.0) and a Role-Based Access Control (RBAC) admin dashboard for content moderation.
- Hosted frontend on Vercel and backend API on Render, configuring strict CORS middleware to ensure secure and seamless client-server communication.

ACHIEVEMENTS

- **Agriculture Price Prediction:** Built and deployed an end-to-end ML system.
- **Prakalp-Swasthya:** Developed and deployed a bilingual (Hindi + English) WhatsApp healthcare bot.
- **InsightGrid:** Designed and shipped a full-stack platform with dual-auth (JWT + Google OAuth) and RBAC admin panel, demonstrating end-to-end ownership from architecture to cloud deployment.

CERTIFICATIONS

HackerRank — Python ,SQL(Basic)

University — TechExpo'2026 , Coderush2.0 Hackathon

ADDITIONAL INFORMATION

Soft Skills	Problem Solving, Attention to Detail, Team Collaboration, Communication, Passion for Learning
Languages Known	English, Hindi
